To:

London Breed, Mayor of San Francisco
Malia Cohen, President of the San Francisco Board of Supervisors

From:

Residents of Hunters Point, as Plaintiffs in the Community Lawsuit Against the
Tetra Tech Company

Date:

July 3, 2018

Re:

Radiated Land at Hunters Point Shipyard

Mayor Breed and Board President Cohen:

In light of the facts regarding the radiated land at the Hunters Point Shipyard ("Shipyard"), as recently revealed by employees of Tetra Tech, hired by the Navy to test and clean up parcels of Shipyard land for Board-approved development, and the lawsuit filed by the people of Hunters Point against Tetra Tech ("Lawsuit") relating to the clusters of cancer permeating the community and the fear now gripping the community due to Tetra Tech employees' admissions of falsified reports declaring Shipyard soil clean, we hereby demand the following of the Board of Supervisors:

1. Immediate halt to all government-sponsored "re-testing" or testing—including scanning—of soil at the Shipyard, including all parcels. Residents no longer trust any arm of the city, state or federal government to conduct such tests.
2. Provide full funding for testing methods and entities approved by the community, as represented by the thousands of Plaintiffs in the Lawsuit.
3. Provide or provide funding for fully-equipped mobile medical units for medical and epidemiological examinations of Hunters Point residents and fund medical and scientific experts to conduct such examinations, as approved by Hunters Point residents, Plaintiffs in the Lawsuit.
4. Conduct at least one public hearing per month from this point forward regarding the cleanup of the soil at the Shipyard and environs to inform and engage the people of Hunters Point who are overcome by fear that they remain exposed to cancer-causing contaminations arising from the radiated soil and false claims of cleanup at the Shipyard.
5. Halt all development and plans for development of the Shipyard and contiguous or related parcels of land by the Lennar company, its offshoot FivePoint Holdings and any and all others developers or prospective developers of these lands until all the land is certifiably remediated.

We look forward to your response. You may contact us via our attorney: Charles Bonner, Esq., Law Offices of Bonner & Bonner, 475 Gate Five Road, Suite 212, Sausalito, California 94965, 415-331-3070, charles@bonnerlaw.com.
